1. Philosophy and vision

As a responsible entity, Eternal Limited (“**Company**”/ “**Eternal**”) is committed to demonstrating a high standard of environmental protection and operating in an environmentally responsible and sustainable manner while minimizing our ecological footprint. Environment sustainability at Eternal is based upon and guided by our sustainability strategy and strong governance, as illustrated in this Environmental Policy (“**Policy**”).

2. Applicability

This Policy applies to Eternal Limited. We expect our employees, suppliers, distributors, and other business partners to comply with this Policy in their business operations involving Eternal.

3. Objectives and scope of the policy

The Policy lays down principles and commitments for Eternal to undertake business operations to deliver a more sustainable future.

Our business operations and value chain result in direct and indirect impacts on the environment. We take responsibility for the environmental footprint created by our business operations and are committed to minimizing the ecological impact of Eternal’s operations.

4. Environmental principles

We recognize the impact we have on the environment, and we aim to fulfil our commitment to environmental stewardship through the following actions:

- Complying with the requirements and spirit of applicable environmental legislations and regulations.
- Aligning organizational processes, establishing quantifiable targets, as appropriate in line with global and national standards and frameworks
- Regularly monitor, measure and evaluate our processes and ensure continual improvement in our environmental performance.
- Identifying, assessing and prioritizing significant risks that might be posed to our business and operations due to climate change preparing for long-term change in climatic conditions or climate related events
- Purchasing products and services that minimize the damage on the environment as measured on a lifecycle basis
- Engaging our employees and business partners to reduce risks from environmental hazards for themselves and others in the vicinity of our operations.
- Promoting environmental awareness among employees and associates and encouraging them to work in an environmentally responsible manner through appropriate training and support initiatives with third parties
- Promoting healthy and sound environmental practices in our value chain including our suppliers, restaurant partners, other kinds of business partners and in our delivery operations via awareness campaigns and trainings.
- Maintaining regular communication with the Board of Directors and senior executives/ leadership by way of meetings focused on climate and sustainability strategy and performance of the Company against the climate and sustainability goals set by the Company.

- Striving to conduct environmental due diligence at pre-purchase/acquisition stage for new investments.
- Striving to adopt and align with environmental standards such as ISO 14001:2015 (Environmental Management System).
- Tracking and transparently reporting on our environmental performance annually.
- Communicating our environmental commitments and performance of the organization to our clients, customers, investors and the general public to raise awareness and generate support.

5. Energy and climate change

Eternal acknowledges the climatic changes that have been seen in the recent decades and the ones which are projected in both the short and long term. We recognize that risks associated with climate change and extreme weather events can have an impact on our operations. We are committed to minimizing our own contribution to climate change and have set a goal of achieving net zero emissions for our food ordering and delivery business by 2033. Our goal of facilitating 100% EV-based deliveries by 2030 is expected to play a key role in contributing towards our Net Zero ambition.

6. Waste management

Eternal is committed to reducing pollution, minimizing wastage and maximizing reuse and recycling across our operations in an environmentally safe manner. We strive to reduce the waste sent to landfill to zero across all premises under our operational control by minimizing generation of solid waste, recycling reusable waste, and disposing excess waste in an environmentally safe manner. This approach extends to all types of waste generated by our operations including but not limited to wet waste, dry waste, electronic waste and plastic waste.

Plastic Waste

Eternal acknowledges the importance of curbing plastic pollution. We are committed to minimizing use of plastic in our own operations and complying with all applicable plastic waste management rules and legislation. We also strive to support our customers and business partners - including restaurant partners and others - to minimize their use of plastic, through relevant interventions that follow the 4R waste hierarchy of reduce, reuse, recycle and recover. These interventions include - awareness campaigns on government mandates around single use plastic, promotion of sustainable packaging alternatives, research on innovative circular business models and promotion of voluntary recycling of all kinds of plastic waste by stakeholders across our value chain.

7. Water management

Eternal strives to minimize usage and impact of our business on water resources across our operations. We strive to improve water use efficiency and reduce our water footprint across facilities where we have the authority to implement changes to water systems, i.e. those facilities under our operational control.

8. Air quality management

Eternal recognizes the growing threat of air pollution to the health of all living beings. We strive to minimize the impact of our operations on both indoor and outdoor air quality by implementing appropriate and effective technologies and optimizing our business practices.

9. Communication of policy

Eternal is committed to transparency by making this Policy available online. Eternal communicates transparently all necessary and relevant information with all stakeholders regarding our policies and procedures related to the environment. We ensure that all stakeholders are made aware of our policy, commitment to complying with applicable laws and regulations, and our voluntary sustainability goals including environmental goals when they join the organization. During an employee's service with the organization, they are sent periodic reminders on the same and informed annually in case of any updates in the Policy.

To guarantee both - continuous application and relevance to our operations and increasing stakeholder expectations - this Policy is evaluated on a periodic basis or whenever a change in external regulations and guidelines or internal process or management practices occurs.

10. Amendment

Any change in the Policy shall be approved by the Board of Eternal Limited. The Board shall have the right to withdraw and/or amend any part of this Policy or the entire Policy, at any time, as it deems fit, or from time to time, and the decision of the Board in this respect shall be final and binding.

11. Performance monitoring

Eternal's CSR committee, a sub-committee of Eternal's Board of Directors, has oversight of ESG matters including all matters related to compliance with this Policy.

The committee reviews and guides Eternal's environmental strategy and monitors its plan of action and progress made towards the environmental goals including its targets related to climate.

At the management level, Eternal's CEO holds the highest responsibility and oversight on matters related to the environment including climate.

The Chief Sustainability Officer (CSO) is also responsible for supervision, administration, enforcement and updation of this Policy and implementing changes required to meet Eternal's environmental commitments and targets. Any queries regarding the Policy shall be referred to the Chief Sustainability Officer.

12. Interpretation

In any circumstance where the terms of this Policy are inconsistent with any existing or newly enacted law, rule, regulation or standard governing the Company, the said law, rule, regulation or standard will take precedence over this Policy.
